

Derived from Section 18.0 of the Rules and Regulations for the Board of Professional Land Surveyors:

Professional Seals, Rubber Stamps and Signatures

A raised seal shall be used wherever possible (on some materials, impressions do not register well).

When a raised seal can not be used, a rubber seal may be used, but only with red ink so that the lettering will stand out.

The signature must be originally hand written.

The seal to be used by a Delaware licensee shall conform to the above regulation and have two concentric circles. The inner circle shall contain only the words "REGISTERD", "NO.", and "DELAWARE". The area between the two circles shall contain, at the bottom, the words "PROFESSIONAL LAND SURVEYOR" reading counterclockwise and at the top, the name of the licensee written below, reading clockwise.

The seal acceptable to the Board is the one recognized in the trade as the NO. 1 official pocket size, which has an inner circle 1" in diameter and an outer circle 1½" in diameter. A sample is below. Replace JOHN DOE AND No. 123 with your name and number.
